Dear Jeremy,

During our recent visit to your company, Dr. I. Kröpfl and I carried out an audit of the production of wing spars for Airbus UK. This audit covered the handling, storage, marking and end inspection of the material. The milling process itself will be added after the extension of the machine bed.

Marshall Aerospace is approved for milling aircraft plate and will be added to our list of approved subcontractors.

Marshall Aerospace is required to follow the purchase specifications (MAA 11151.0 – 11151.7) very strictly and to incorporate these requirements into their works orders. These documents are distributed as PDF files by e-mail, so that we require an e-mail address from you for the distribution. Please let us have details of the person in your company responsible for such documents.

May I also take this opportunity to thank you for your co-operation during the audit. If you have any queries, please do not hesitate to contact me.

Your sincerely,

Corus Aluminium Walzprodukte GmbH

Gunter Mettler
Manager Quality Technique and Systems
